

Quest — Curated Learning Videos

9 core levels + Tax Detective standalone challenge · 10 videos per section · 100 total

How to use: each row lists a video title, creator, and a YouTube search link that resolves to that video (or the closest active upload from the same creator). Search links are used instead of direct URLs so no link breaks when a creator re-uploads. All creators are established Indian financial educators — pedagogy matches Quest's India-first framing.

Level 1 — First ₹1,000

Stage: Start Investing. Absolute basics: what investing is, why start small, opening a demat, first trade mechanics.

#	Video	Creator	Open

9	Dividend Taxation Rules in India	CA Rachana Ranade	Watch
10	Common ITR Filing Mistakes to Avoid	CA Anoop Bhatia	Watch

Notes on Curation

- Videos are chosen for pedagogical fit with each level's learning objective, not popularity alone.
- Where a topic has both Hindi and English strong versions, the level of the learner is trusted to pick.
- Creators lean toward long-form explainers (CA Rachana Ranade, Pranjal Kamra, Zerodha Varsity) for foundational levels, and toward tactical operators (Akshat Shrivastava, Shashank Udupa, Sahil Bhadviya) for market-reading levels.
- Tax Detective leans on CA-credentialed creators (Rachana Ranade, Anoop Bhatia) plus Labour Law Advisor for ITR filing walkthroughs.
- Before shipping in-app, verify each search resolves to a live video and cache the resolved video ID in Firestore under **video_catalog/{level}/{slot}**. Do not embed the search URL directly in the daily video gate — it must resolve to a single canonical video ID for the completion-check logic.

Suggested Firestore Schema

```
video_catalog / {level_id} / videos [ { slot, title, creator, youtube_id, duration_sec, mcq_ids[], added_at } ]
user_progress / {uid} / {level_id} / { videos_watched: [slot], mcqs_passed: [mcq_id], unlocked_at, completed_at }
```
